Top products.
Top workmanship.
Top quality.

Fencing is not just fencing.
 It's so much more than that.
 It's what keeps our family, pets,
 property and businesses safe.
 It's what enhances our gardens
 and creates curb appeal.
 It's what finishes off a building
 and gives added value to any
 and all properties.

As a leader in the design, manufacture and supply of unique physical barriers in South Africa, for more than a decade, Topfence offers a truly unique range of physical barriers. From our aesthetically pleasing palisade fencing to our durable and ever-popular Wireview™ range, we have a solution to suit every taste, security need, functionality and pocket.

Our extensive experience working with architects, developers, main contractors, local authorities, fencing contractors, government organisations, business owners, home-owners and leading security consultants has strengthened our insight into the needs of our customers, allowing us to further innovate our fencing systems. This, together with the latest technology, means we can manufacture high-quality products at very competitive rates. The result of which is: Topfence is now the preferred choice for perimeter protection for industrial, commercial and residential applications.

A product of

The logo for WireView is displayed on a solid blue background. The word "WIRE" is in a large, white, sans-serif font, with a small "TM" trademark symbol to its upper right. Below "WIRE", the word "VIEW" is written in a similar white, sans-serif font. To the right of "VIEW", there is a series of eleven vertical white bars of equal height and width, spaced evenly apart.

Popular. Safe. Stylish. When it comes down to the wire, Wireview™ is the ideal perimeter solution for your aesthetic and security needs. As the only manufacturer of Wireview™ in the world, Wireview™ has grown to become the leading perimeter barrier for residential, estates, commercial and industrial facilities within South Africa.

Wireview™ offers a unique fencing structure that combines engineering, security and design to provide transparent unobstructed views that are both aesthetically pleasing and work well to optimise CCTV surveillance.

The innovative arrangement of wires not only makes cutting or climbing impossibly difficult but is strong enough to offer the protection of a solid wall.

The features and benefits of Wireview™

Our fixing of panel to post is unique, as we use a cover plate across the entire height of the panel making it difficult to penetrate. The unique post to panel fixture, also allows for flush post and panel finish.

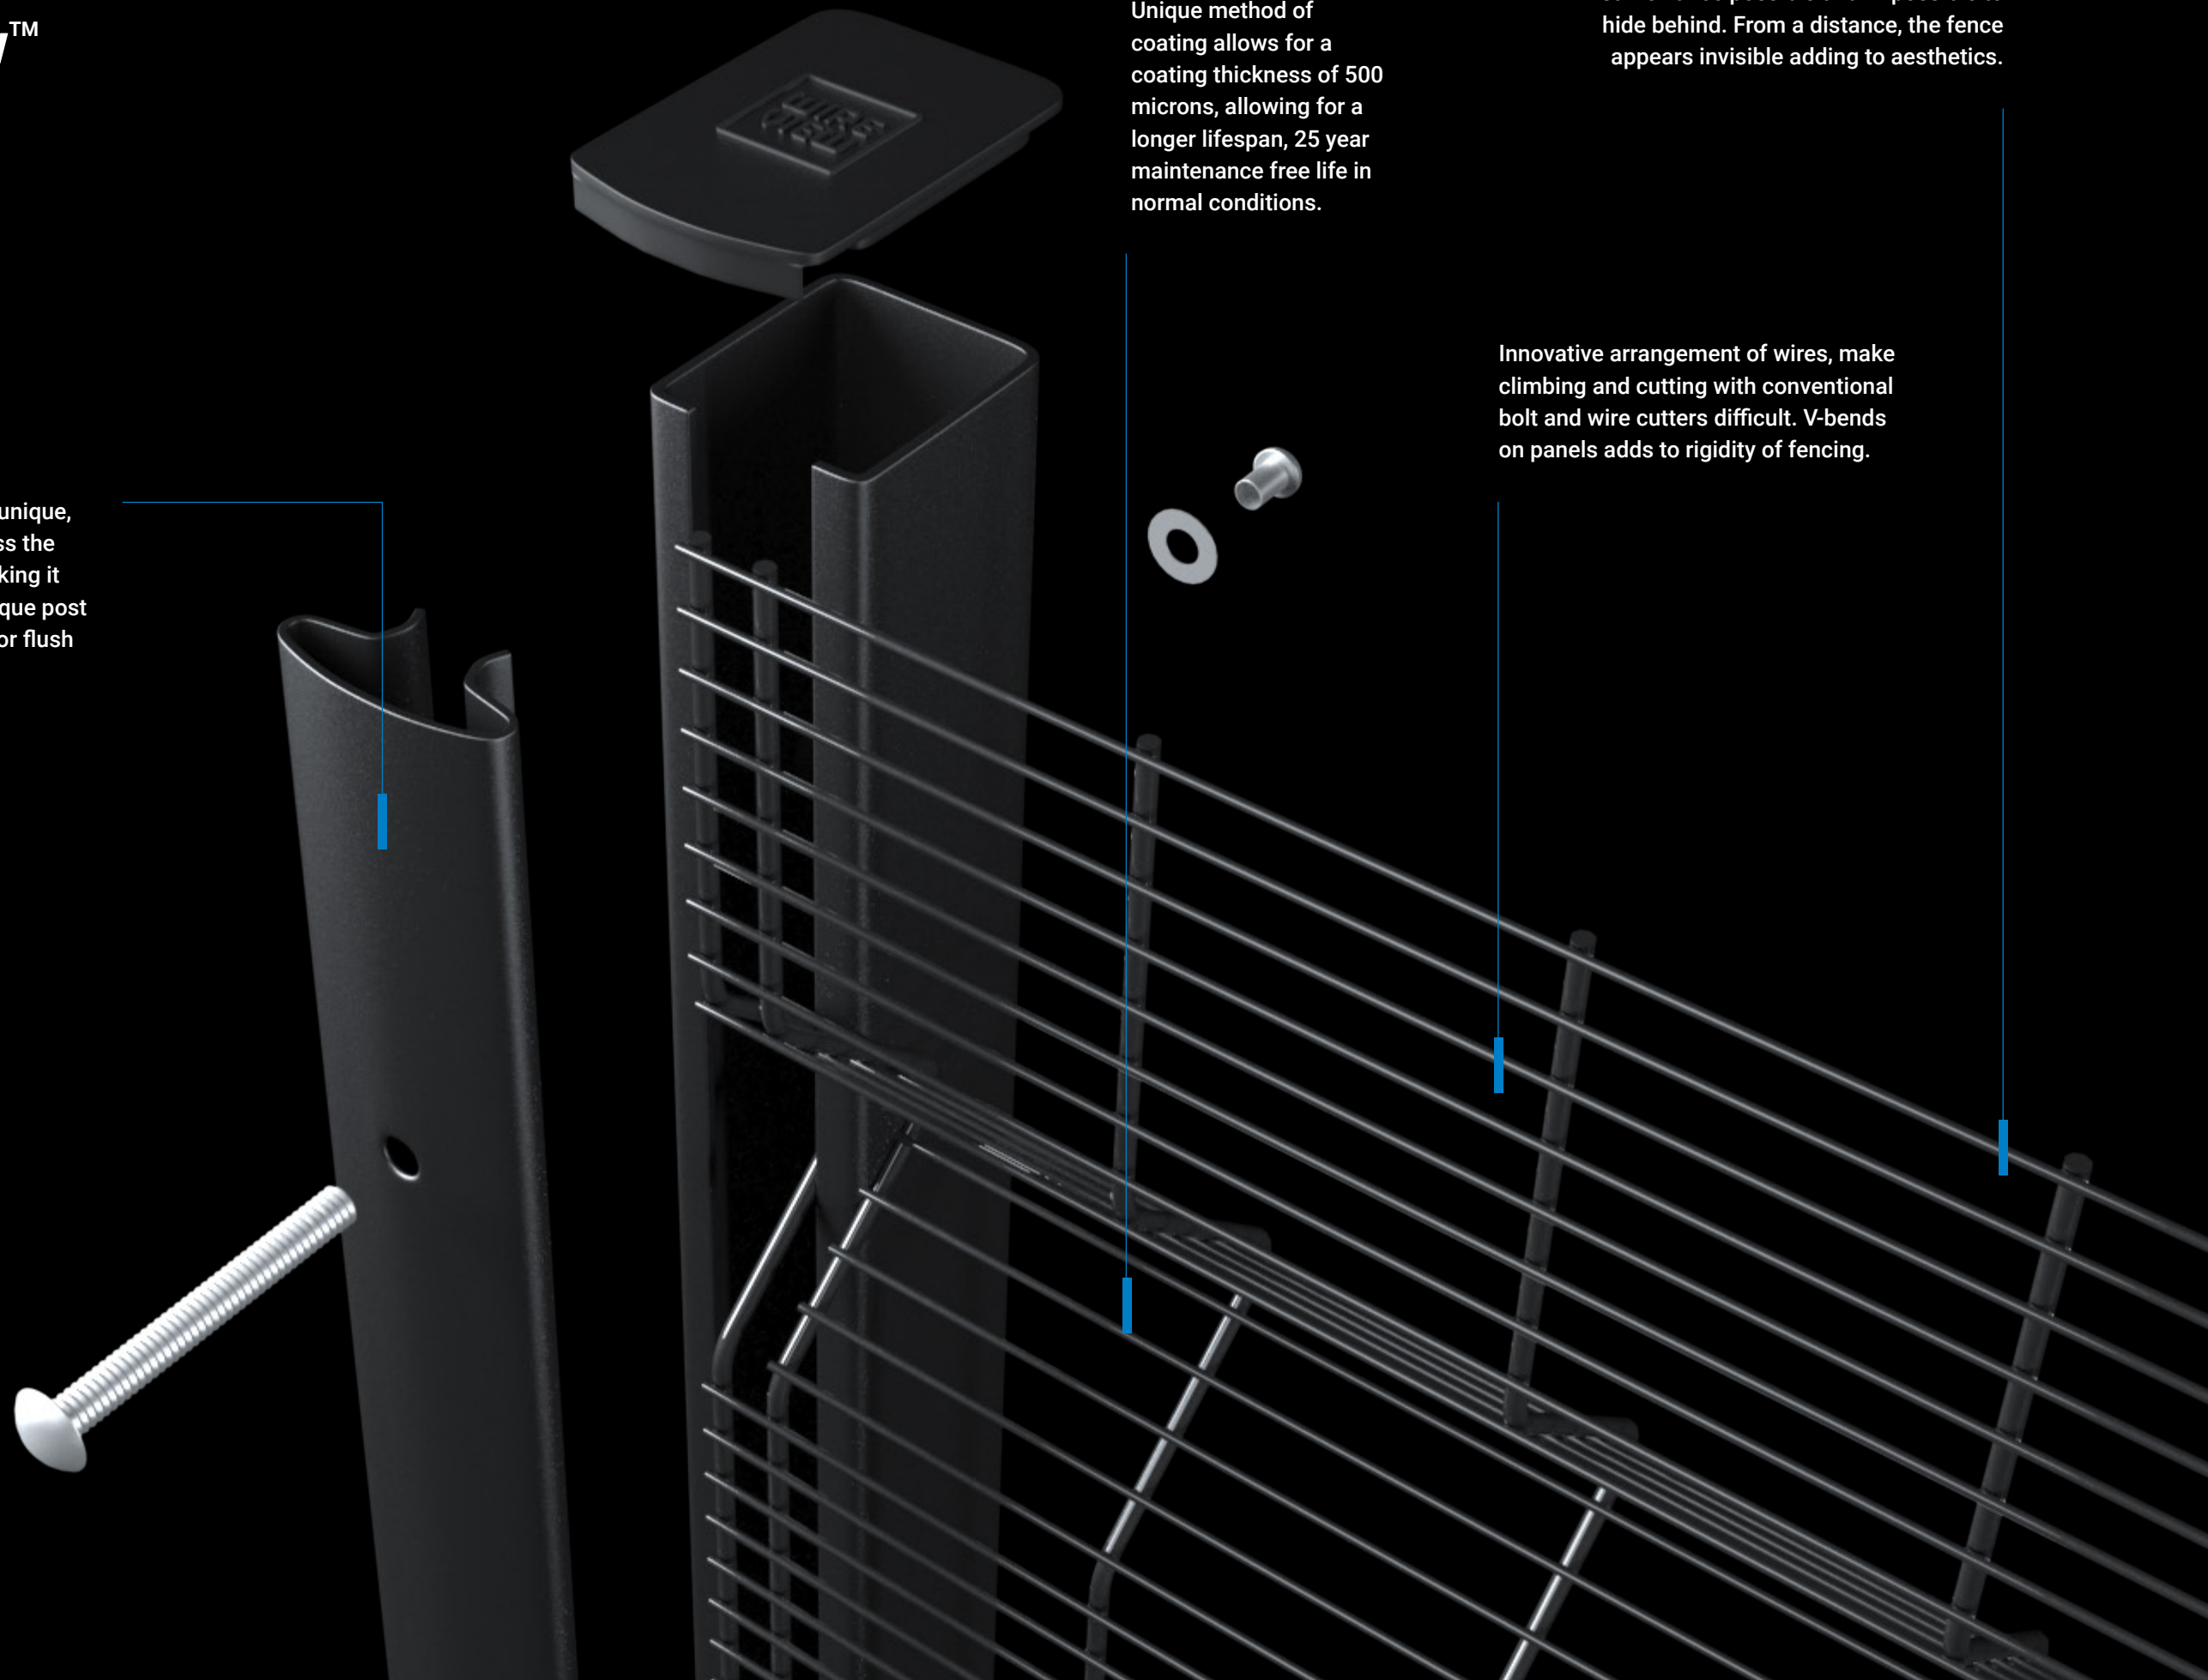

Spike topping available for added security.

Three variations available for different levels of security.

Unique method of coating allows for a coating thickness of 500 microns, allowing for a longer lifespan, 25 year maintenance free life in normal conditions.

Transparent views making CCTV surveillance possible and impossible to hide behind. From a distance, the fence appears invisible adding to aesthetics.

Innovative arrangement of wires, make climbing and cutting with conventional bolt and wire cutters difficult. V-bends on panels adds to rigidity of fencing.

Designed to work hard

The Wireview™ post system has been developed with an unmatched panel to post fixing. The panel is sandwiched between the post and cover plate forming a uniform clamping system making it near impossible to break through or tamper with. Extended posts are available to accommodate additional security features such as electric fencing, flat wrap razor, or BTC coil toppings.

Designed to last

The Wireview™ system is coated with Topfence's thermoplastic coating, Fusionguard™, which offers a 25 year maintenance free life in normal conditions. Unlike PVC and Polyester, Fusionguard™ fuses to the galvanised metal, ensuring excellent adhesion. This unique method of coating allows for a coating thickness of 500 microns, for longevity, whilst maintaining a high level of aesthetics.

Contact us today

We have unique Wireview™ systems designed for many different applications. Get started by speaking to one of our experienced consultants about your perimeter barrier needs today.
